

INTRODUCING THE Kiwi EV CLOUD

Our smart back office management system for workplace, fleet and destination charging.

The Kiwi EV Cloud enables businesses and organisations to completely control and manage their network of electric vehicle charging points whilst providing a seamless charging experience for EV drivers.

The Kiwi EV Cloud integrates with the Autel Series EV charge points and with its OCPP compatibility, the Kiwi EV Cloud can also be integrated with any OCPP compliant EV charge point on the market.

Benefits to charge point operators

Set costs
Set up costs for charging and generate additional revenue.

Reporting & Analytical Feedback
Easily understand charge point and energy consumption data.

Remotely Control Charge Points
Manage your chargers at individual, group, socket or user level.

Automatic Fault Notifications
Know when your charge points are faulty and require troubleshooting.

Multi-site Visibility
Control your entire charge point network across all of your locations.

Over the Air Firmware Updates
Always operate using the latest version of the Kiwi EV Cloud.
